Our blend of coffee contains only the finest Arabica beans from Brazil, Nicaragua, Mexico, Guatemala and Ethiopia. Arabica beans are grown more than 1,600 metres above sea level for slower growth and a more intense flavour.

This triple certified coffee blend contains 33% Fairtrade organic Columbian beans, 33% Fairtrade organic Sumatran beans and 33% Fairtrade organic Rainforest Alliance certified Peruvian, making it a great sustainable and ethical choice. The Fairtrade Foundation changes the way trade works through better prices, decent working conditions and a fairer deal for farmers and workers in developing countries.

Rainforest Alliance certification means complying with 10 standards including ecosystem conservation and wildlife protection, while organic status is awarded by the Soil Association, the UK's leading food and farming charity.

All our hot drinks are available to takeaway, with a 30p discount if using your own reusable cup.
